

Xtra Quests Patch Instructions

=====
Several Errors have been found in XQSE and XQ2, and should be fixed immediately. If you are using the unpatched versions of either of these packs, read on.

=====
XQSE Patching

In the ZIP file containing the patched quests, you will find the following quest files:

00b30y16.qrc
00b30y16.qbn
Q0c00y03.qrc
Q0c00y03.qbn

Each of these files fix an error in the quests, and should be copied to your ARENA2 directory. Overwrite the old ones. This fix is ONLY needed if you have the unpatched version of XQSE.

=====
XQ2 Patching

In the ZIP file containing the patched quests, you will find the following quest files:

A0c00y21.qrc
A0c00y21.qbn
A0c10y23.qrc
A0c10y23.qbn

Each of these files fix an error in the quests, and should be copied to your ARENA2 directory. Overwrite the old ones. This fix is ONLY needed if you have the unpatched version of XQ2.

=====
Patch Check

To check if you have the unpatched or patched version of XQSE and XQ2, open the readme for each. On the first line, in the title, you will see (patched) if you have the patched version. Otherwise, you will need to do the changes above.
